

## BREATHE EASY - STAY CLEAN WITH EQUICLEAR™

### WHAT IS EQUICLEAR™?

EquiClear is a safe, eco-friendly solution for arena dust control on existing footings. EquiClear is an organic, nature-friendly clear liquid that lasts up to one year per application. EquiClear provides a safer, cleaner environment for horses, riders, trainers, spectators, and all others associated with equine care and support.

### WHY USE EQUICLEAR™?

EquiClear extends the life of existing arena footing and helps stabilize materials for improved consistency. EquiClear provides a clean, pristine arena environment for a safe, comfortable, and enjoyable riding experience for both horse and rider. Your arena, clothing, horses, tack, and surrounding areas will stay cleaner with EquiClear. EquiClear eliminates the need for watering, resulting in significant savings and reduced inconvenience. Your arena will remain cleaner and more consistent from morning until evening.

EquiClear can be used indoors or outdoors and will not wash away with rain.

### EQUICLEAR™ FEATURES

- Safe for animals & humans
- Nature Friendly, Non-Toxic
- Significantly reduces health risks
- Lasts up to one year per application

### A MULTIPURPOSE DUST SUPPRESSANT

- Indoor & Outdoor Riding Arenas
- Shed Rows
- Show Arenas
- Training Areas
- Round Pens & Walkers
- Parking Areas

Provides a  
safer, cleaner  
environment

## APPLICATION

EquiClear is easy to apply. EquiClear is spray-applied using simple spray equipment. Typically, any equipment capable of spraying water can be used to spray EquiClear. Simply spray the recommended amount on arena the surface and allow it to soak in. You are then ready to ride. The initial application of EquiClear will typically last up to one year. Additional applications require only 25-30% of the amount of material that was used on the initial application for the same longevity.

Consider EquiClear a dust control program that uses less and less material for each application. With periodic touch ups, EquiClear is designed for lasting dust control throughout the life of the footing materials.

## APPROXIMATE COVERAGE RATES

Footing Depth	EquiClear Coverage Rate	Footing Depth	EquiClear Coverage Rate
One inch	36 sq. ft. per gallon	Four inches	9 sq. ft per gallon
Two inches	18 sq. ft. per gallon	Five inches	7.2 sq. ft. per gallon
Three inches	12 sq. ft. per gallon	Six inches	6 sq. ft. per gallon

The above coverage rates are for a typical application. There are many factors that affect typical coverage rates such as clay content, rubber and fiber content, or extremely absorptive soils. If desired, application over a small test area will provide a more accurate coverage rate.

### IMPORTANT

EquiClear is not recommended for arenas or other areas consisting of tilled-up or existing dirt. EquiClear is specifically designed for arenas with a firm compacted base and a separate layer of loose footing material consisting of sand, sand/clay blend, stone dust, or other designated footing material deemed compatible by EquiClear laboratories.

The dangers associated with fugitive dust have been well documented. A dusty arena can lead to irreparable lung damage and disease in humans and animals. EquiClear is designed to reduce or eliminate the health risks associated with dust and other airborne particles.

## PACKAGING

Available container sizes:

5 Gallon Pails, 55 Gallon Drums, 275 Gallon Totes, Bulk Tankers

P.O. Box 2218 • Sandusky, OH 44871
